CONCEPT

cantina solar
Solar powered Cantina that promotes Projects of Ecology -rural topics will be sent to a Urban society.
The goal is tagging chefs of big business and the owners of the leading company into investigating the new biological possibilities. The promotion issue a big thing -the future society.

Pss We Lick in Ton.
Rual environments deploy big farmers to fit them to up today technologies this Cantina will knock on the doors of beat the day companies and lift them up to longline options.

The environment is crucial not more than slices of the label known-profit will be dedicated to the rural investor but the top of the iceberg is visible!
Liturgy always blocks Data on new Technology, this is a work advertisement!

Flagrantly hopper line of rural products is getting revolved to put outlines to most deficient outsourcing of inner conducting.

BUDGET

Solar panels (e.g. 4 x 320 Wp): approx. €2,500
Battery storage (e.g. 2 kWh): approx. €1,500
